AZIMUT

The AZIMUT range of attachment supplied by TECNOINDUSTRIE MERLO S.p.A. comprises rear loader mini-compactors, with unloading by tipping over the bucket, fitted with an articulated single-blade compaction system with a rotary blade and a slide running on straight guideways. The central rear part of the attachment houses the bin pick-up, lifting and emptying system (optional) with a possible load-assist device. The attachment is compliant with Machinery Directive 2006/42/CE and is certified by an independent notified body.

CHARACTERISTICS AND STANDARD EQUIPMENT	AZIMUT 6	AZIMUT 8
Dump body volume (m3)	5.5	8
Total mass on ground (kg)	3500 - 5200	5000 - 8000
