URBIS 2-3

The URBIS 2 & 3 series attachment supplied by TECNOINDUSTRIE MERLO SpA comprises simple rear-loading tanks with tip-up discharge using a specific double-acting cylinder with a single stem. Manual tank loading by operators is facilitated by or tip-up side tailgates on the bodies with stainless steel hinge. .

The central rear part of the attachment houses the bin pick-up, lifting and emptying system (optional) with a possible load-assist device.

Tipping kinematics and tank configuration ensure the possibility of performing coupling manoeuvres inside the rear compactors fitted with a universal loading aperture.

CHARACTERISTICS AND STANDARD EQUIPMENT	URBIS 2	URBIS 3
Dump body volume (m3)	2.2	3.2
Total mass on ground (kg)	From 1500 to 1700	2000 - 2200
Discharge system	By means of dump body tip-up	
Unloading into compactors with universal aperture	•	•
Two side hatches with safety closure	•	•
Two automatic rear hydraulic stabilisers	•	•
Rear white LED beacon	•	•
PVC tank cover	0	0
Bin turn device	0	0
Hanging pushbutton panel with coil cable for tank unload on-board machine	0	0
Hanging pushbutton panel with coil cable for handling the bin lift & turn device	0	0
Manual emergency pump	0	0
Rear load assist	0	0
Rear rubber pads	0	0
